### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: While the prior art shows krypton and xenon recovery by adsorption from an oxygen stream, no evidence can be found of using adsorption to remove krypton and xenon from a liquid oxygen stream that is mostly vaporized and contains a concentration of xenon no greater than 50 times the concentration of xenon in air. For example, in Shino et al (5,039,500) the liquid contains "several tens of ppm of xenon" (col. 1 lines 64-65). This is similar to Golden et al (6,658,894 Col. 7 line 48) which states a concentration of 20-60 ppm. Given a concentration in standard air of approximately .08 ppm, the references use a stream having over 200 times the concentration of air. Using a feed stream of lower concentration is seen as counterintuitive and thus nonobvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William C Doerrler whose telephone number is (703) 308-0696. The examiner can normally be reached on Monday-Friday 6:30-4:30.
